

Declaration of Compliance

1986 California Proposition 65

Per- and polyfluoroalkyl substances (PFAS)

EU 2019/2021 (POP)

Product / Component/ Material : DAT Series Reed switches

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. These chemicals can be in the products that Californians purchase, in their homes or workplaces, or that are released into the environment.

Per- and polyfluoroalkyl substances (PFAS) are a large class of thousands of synthetic chemicals that are used throughout society. However, they are increasingly detected as environmental pollutants and some are linked to negative effects on human health.

Persistent Organic Pollutants (POPs) are poisonous chemical substances that remain intact in the environment for long periods and are harmful to the environment, wildlife and humans if they are not disposed of safely.

Cynergy3 components Ltd declares that the above product does not contain any controlled or banned substances and complies with the above guidelines or regulations.

Please contact the undersigned if you have any questions relating to this matter.

Yours sincerely
